Professional Experience

Dot X Technologies. – Senior Mobile Engineer April 2024 – Present.

- **Designed and delivered** the DOT Personal Banking app (30K+ downloads), enabling seamless retail transactions on [PlayStore](#) and [AppStore](#).

- **Architected the Business Banking app** for SMEs and agents, improving access to core banking tools on their [Android](#) devices.
- **Built and integrated** card request module on the DOT Agent [POS](#), reducing onboarding friction.
- **Led end-to-end development of the DOT HMO mobile app**, enabling seamless onboarding to digital HMO services for users on their [Android](#) devices.

Credellex Technologies. – Senior Mobile Engineer JUNE 2024.

- **Developed the Credellex App** for seamless digital banking on their [iOS](#) platform.
- **Launched the Escrow feature**, ensuring safe buyer-seller transactions on our platform.

Tribapay. – Lead Mobile Engineer JANUARY 2023 – OCTOBER 2024.

- **Led end-to-end development of the Tribapay mobile app**, achieving **50K+ downloads** across [PlayStore](#) and [AppStore](#), enabling seamless digital banking for their users.
- Built and launched the **CASHPIN** feature, for easy money transfer and sharing across users
- Built and launched Internal tools to analyze and track operation metrics for customer support and KYC Processes.
- Built and launched the cross border payment feature to enable seamless transfer of funds between our Ghanaian and Nigerian customers
- Developed the **Payment Link** feature to enable users create invoices and request payments using a link.
- **Led end-to-end development of the Tribapay Business mobile app**, now actively deployed on both [Android](#) and [iOS](#) platforms, enabling seamless digital banking for business users.

Digicore. – Mobile Engineer JANUARY 2021 – JUNE 2024.

Digicore is a leading provider of digital solutions for financial and insurance institutions across Africa. During my tenure, I led the development of multiple high-impact mobile applications that enhanced digital banking experiences and accelerated financial inclusion on the continent:

- **Contributed to the development of the UNIFI mobile app** for Unity Bank achieving **1M+ downloads** across [PlayStore](#) and [AppStore](#), enabling customers to perform secure transactions and bill payments via an intuitive mobile experience.
- **Played a key role in building the LAP0 mobile app**, delivering a user-centric banking platform that supports secure payments, transfers, and loan management – with over **200k+ downloads** on [PlayStore](#) and [AppStore](#).
- **Led the design and implementation of the Advantage App**, a self-service platform that allows users to purchase, manage, and maintain insurance policies entirely online on both their [Android](#) and [iOS](#) devices.
- **Spearheaded the development of the AdvantageConnect – LifePlanner App**, empowering Life Planners to connect with clients on both [Android](#) and [iOS](#) Platforms through in-app chat, video meetings, and policy management tools – driving customer engagement and revenue growth.

WORLDHERO PAY – Senior Mobile Engineer – DECEMBER 2023 – MARCH 2025

- **Led the development of the WORLDHERO PAY mobile app**, empowering users to send money to over 20 countries with competitive exchange rates and low transaction fees – now live on both [iOS](#) and [Android](#) platforms.

CAMELCASE TECHNOLOGIES – Senior Mobile Engineer – DECEMBER 2023 – PRESENT

Camelcase is a software development agency specializing in building scalable, high-performance solutions for a global client base.

- **Led the development of the SAFEPAZZ mobile app**, a next-generation visitor management platform designed to modernize access control and enhance on-site security – successfully launched on both [iOS](#) and [Android](#) platforms.

KINNECT, NIGERIA – Senior Mobile Engineer(contract) – JULY 2024 – OCT 2024

Contracted to lead the development of Kinnect, an [Android](#)-based matchmaking app designed to foster genuine connections through real-time chat, personality-driven quizzes with scoring, and intelligent location-based matching

FUSION by C-One – SENIOR Mobile Engineer(contract) – FEB 2023 – APR 2023

Fusion is a community-driven social platform enabling creators and users to share ideas, interact transparently, and perform peer-to-peer transactions through integrated Fusion wallets.

- **Contributed to codebase stability** through critical bug fixes and architectural refactoring, while implementing key features including external content sharing and user mentions.
- **Integrated deep-linking**, enabling shared links to navigate directly to targeted in-app screens for a smoother user experience.
- **Developed the live streaming module**, allowing users to engage in real-time communication during live sessions.
- Successfully deployed to both [Google Play](#) and [App Store](#).

FREELANCE SOFTWARE DEVELOPER – FEB 2019 – PRESENT

Over the course of my professional career, I've independently built and deployed several impactful software solutions:

- **LocaTrack** – A personal safety and emergency response app built with Flutter offering on-demand private security and medical assistance across South Africa. **Live on** [PlayStore](#) and [AppStore](#).

- [Ifexes.com](https://ifexes.com) – A full-featured e-commerce platform developed for Ifexes Nigeria, supporting online retail and order management.
- **Caca.ng** – An e-commerce solution tailored for Caca Nigeria, built to streamline product browsing, payments, and logistics.
- **Gvest** – A cooperative investment platform enabling fractional ownership in real estate, with integrated savings plans and wealth-building tools.
